

## FOR2372 Kolloquium (SS 2017)

Montags von 14.30 bis 16.45 Uhr

15. Mai	<p>Evi Kostenis <i>"Current status FOR2372"</i></p> <hr/> <p>Projekt 2 (AG Imhof): <i>Synthesis and characterization of macrocyclic peptide inhibitors of the G<math>\alpha</math> protein family</i></p> <hr/> <p>Projekt 3 (AG Gütschow): <i>Development and characterization of heterocyclized dipeptide derivatives as inhibitors for heterotrimeric G proteins</i></p>
22. Mai	<p>Projekt 1 (AG König): <i>Biosynthesis and structural modifications of the selective Gq protein inhibitor FR900359 in Ardisia crenata</i></p> <hr/> <p>Projekt 4 (AG Müller): <i>Probes and inhibitors for heterotrimeric G Proteins: synthesis, characterization and application</i></p> <hr/> <p>Projekt 5 (AG Tietze): <i>Towards understanding structural and dynamical determinants of G protein inhibition - rational design of novel subtype specific G protein inhibitors</i></p>
12. Juni	<p>Projekte 6 &amp; 7 (AG Kostenis): <i>Molecular modes of action and application of cell permeable inhibitors for heterotrimeric G proteins</i></p> <hr/> <p>Projekt 8 (AG Pfeifer): <i>Gq-dependent signaling in adipose tissue - focus on brown adipocytes</i></p> <hr/> <p>Projekt 9 (AG Fleischmann/Wenzel): <i>Direct pharmacological G protein modulation in the lung</i></p>
19. Juni 26. Juni	Ersatztermine
